the heart of
everything
we do*

More than just windows & doors

Vevo means more than just windows and doors, it's about improving your home and enhancing your lifestyle. From rustic to contemporary, Vevo windows, doors and conservatories improve your home's energy efficiency, enhance your lifestyle and help keep your family secure.

The mark of Security, Reliability,
Quality and Peace of mind only
comes from Vevo.

People you can trust!

Do you want a refreshingly unpressured and knowledgeable approach to choosing uPVC windows, doors and conservatories?

Choose from our extensive range of Vevo products and enjoy the highest quality as well as professional design and installation. By providing beautiful windows and doors we aim to enhance your home and lifestyle. They'll protect you from the elements too, keeping you and your family cozy in winter and improving ventilation in the summer.

We only employ experienced installation technicians and salespeople. Along with having the finest products in the business, it's the key to your quality installation. First you get sound advice. Then your doors and windows are professionally fitted to the highest possible standard for your lasting satisfaction.

With glazing technology changing so fast, you won't want to miss out. Naturally, we keep up with all the latest developments. So you can enjoy the best from the glazing industry.

Vevo windows, doors and conservatories will transform your home like no other product. We believe they're the best on the market; that's why we offer them to you...

PVC Windows & Doors

Vevo PVCu Profile

Why it is the best on the market

Zero Air Leakage

Patented co-extruded bubble gaskets which out perform all others in permeability - achieving a zero air leakage result at independent tests at BSI.

Screw Retention

Hollow pockets allow for the insertion of UPVC screw retaining strips to achieve 'screw pull out forces' to rival 1.2mm steel.

Strength

The six chamber design achieves strength without the need for thermally inefficient steel inserts in both window sashes and window outer frames.

Energy Efficient

The uniquely designed six-chamber energy plus system is so efficient it can achieve the energy rating of A++

Heat Conserving

A sign of how well insulated our Vevo windows are is that so little heat escapes, that it is not uncommon to see condensation on the OUTSIDE!

Lead Free

All Vevo Upvc products are completely lead free.

VevoFlush

With the look of timber windows but all the benefits of Upvc, the flush sash window has clean lines and looks as good in a modern or traditional house.

VevoChamfered

The chamfered option creates a symmetrical, contemporary, straight edged style.

Typically considered a more modern look.

VevoSculptured

The sculptured option gives a more curvaceous, traditional, decorative finish to your window.

A popular choice for period properties.

Better for the Environment

Energy ratings explained

One of the most effective ways you can save energy within your home is through installing energy efficient doors and windows.

Whether double or triple glazed, Vevo windows outperform most of the other leading windows in the UK – mainly due to our innovative PVCu multi-chambered profile design.

With Vevo, you can enjoy the benefits of the latest energy-rated windows systems from a highly commendable 'B' to the highest A++.

The rating scale runs from A++ to E, and indicates how well a product will:

- Help you contain and conserve heat within your building in the winter
- Keep out the elements
- Resist condensation on the inside
- Contribute to improved sound insulation.

Energy Rating

Licence No: PLC 0737-1

Customer No: ERC 121
 Company Name: Garrard Windows Ltd
 Postcode: LU7 9GX
 System: Linlar Chamfered
 Type: Casement
 Energy Rating: A++ Unit: kWh/m²/year

PLC Scheme
Evaluating Energy Efficiency

For more information about this label, please visit plc-scheme.com

This label is not a statutory requirement.
This is an official PLC Scheme label and must not be reproduced by any other individual or organisation.

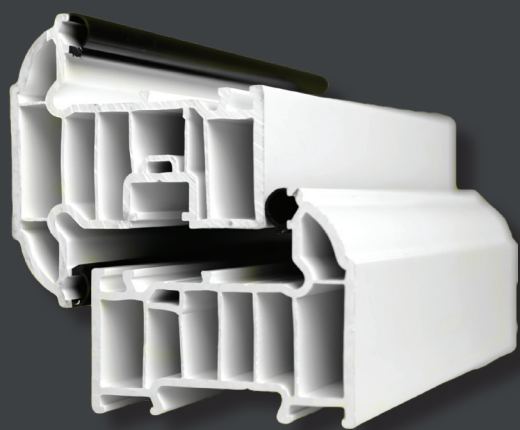

The Vevo windows that we install can achieve an 'A++' rating, better than most of our competitors, which means you'll be able to enjoy a warmer and quieter home as well as lower energy bills.

Lead-free

The Vevo windows we install are made from 100% lead-free PVCu – better for the environment and better for you and your family. You no longer have lead in your petrol or paint, so why choose to have windows containing lead?

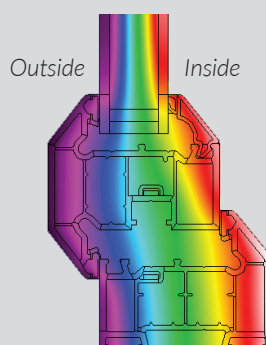

EnergyPlus

Setting new standards

The Vevo EnergyPlus range offers even greater energy efficiency for your home.

The uniquely designed six-chamber energy plus system is so efficient, it can achieve an A++ rating using a triple glazed unit.

The cross section above shows how the multi-chambered profile prevents the transfer of heat from the inside to the outside.

Windows

Not every PVCu window system is the same

When you're deciding which range of windows to choose for your home, there are a number of factors to consider:

- *Will they look good?*
- *Will they be sympathetic to the overall building design?*
- *Will they exceed the most stringent energy efficiency targets and help minimise ongoing heating bills?*
- *Will they provide the highest levels of safety and security?*
- *Are they available in a wide range of styles and colour choices?*
- *Is there a range of matching doors, roofs and other products available?*
- *Will the products be guaranteed?*

The Vevo range is different to other systems on the market – being designed from scratch to take advantage of the very latest developments in window engineering technology.

Combining high-tech design and engineering with the flexibility to create an individual appearance for every home, the Vevo system pushes the boundaries of possibility with a range that doesn't even need to look like PVCu. And with the patented double-action bubble gasket offering a continuous seal, even in the corners, draughty windows are a thing of the past.

Safe & Secure

Keep the intruders out!

Your home should be a safe haven – that's why all our windows are designed, tested and certified to meet the highest standards of security. We also cyclic test our moving parts to make sure they won't wear out, however much you use them.

Child restrictors can be fitted to almost any Vevo window to give you extra peace of mind that your little ones will be safe – please ask for more information.

Enhanced Security

High security shootbolts top and bottom.

The shootbolts are double the thickness than most on the market.

An end cam fitted close to the shootbolt adds extra security.

Metal keeps for maximum security.

The centre lock has robust opposing cams that firmly grip both ends of the keep to resist attack.

PAS24: 2022

This accreditation is part of the British Standards system and shows that every component used to make the product has been subjected to a series of tests, demonstrating enhanced security performance for your peace of mind.

Secured by Design

Secured by Design (SBD) is the official police security initiative that works to improve the security of buildings and their immediate surroundings to provide safe places to live, work, shop and visit. The Police Preferred Specification - provides a recognised standard for all security products that can deter and reduce crime.

Casement Windows

The casement window offers total versatility and is still the most popular choice available today.

The traditional British window style offers slim sight lines to allow in maximum light.

You can say goodbye to draughty windows as the patented double-action bubble gasket gives a continuous seal - even in the corners.

Available in sculptured (curved) or chamfered (bevelled) 70mm profiles (frames), with either 28mm double or 40mm triple glazing. Vevo casement windows are normally internally beaded, but can be externally beaded.

To add character you can add astragal bars or Georgian bars. You can also choose from a wide choice of colours, finishes, hardware and glazing options.

Flush Sash

Windows

Carefully constructed at our 90,000 ft² facility, the stylish Liniar Resurgence Flush Sash Window is available in our range of stock colours.

Alternatively, if your customer is after something a little different, having the windows sprayed or special foil colours are the answer.

Our flush sash window has mechanical outer frames and welded sashes. There is a double rebated seal, so there are no unsightly visible gaskets. You can opt for a vented head drip which gives the window a sleek and stylish finish by replacing the need for an external trickle vent.

Shaped *Windows & Doors*

Here at Vevo we are proud of our manufacturing and design capabilities and we pride ourselves on our experience and expertise and our ability to 'fit any window, anywhere'.

Our ability to manufacture windows in all shapes and sizes sets us apart from the competition and provides you with more choice. Once your windows are designed and built at our UK based workshops our Vevo craftsmen and expert fitters can install your beautifully crafted shaped windows almost anywhere and look forward to the challenge.

As with our standard range of double glazed windows the Vevo shaped windows you require can still be made from a choice of an almost limitless range of colour finishes, profiles, textures and styles for the look you want.

A window does not have to be square. Vevo can manufacture windows in all shapes and sizes and are happy to undertake more difficult installations. Arched, round or simply 'odd-shaped' we can provide the solution.

Tilt and Turn *Windows*

If you love having your windows open to let in fresh air, but worry about security, why not consider Vevo tilt and turn windows for your ground floor?

The open-in style of window is very much a European design and is ideal for cleaning from within (in the turn position).

Ideal for high-rise as well as low-rise applications, the tilt and turn window offers a greater scope for larger opening lights than a traditional casement window and the larger panes of glass help its thermal performance.

Perfect as a fire escape or simply to let in more fresh air, most windows are supplied as 'tilt before turn' to make them safer and avoid the risk of children opening them fully in the first instance.

With many practical benefits, tilt and turn windows are also available with as many options as our popular casement window.

Bow and Bay

Windows

Bay or bow windows are a great way to bring more light into your home. Choose from different styles and colours to get exactly what you need.

Vevo's innovative bay and bow windows offer a number of features and benefits unrivalled in today's market place and are available in a range of styles.

The ultra-slim frames of Vevo's beautiful windows increase the flow of natural light as well as creating an enhanced field of view.

Enhance the look of your windows with a range of additional designs including leaded glass, Georgian or astragal bar, or decorative sash horns.

Decorative glass fanlights can be ordered to closely match your existing designs. Ask our sales team for guidance.

Sash Horn Windows

Vevo's industry leading sash horn windows provide the traditional style of yesteryear combined with 21st century materials, offering superior performance and functionality.

Sash horn windows preserve the classic look of wooden box-sash windows while maintaining the authenticity of any property.

They are designed to achieve the highest levels of weather-tightness and resistance to draughts.

Made to compliment our casement range, the sash horn window looks like a traditional sliding sash but performs as a casement - giving you the best of both worlds.

The high security shoot bolt locking systems provide unparalleled protection against break-ins and the windows can be customised with accessories such as Georgian bars for an individual appearance.

Bifold Windows

Vevo bi-folding windows can enhance almost any type of building.

Popular for use in conservatories and orangeries, the bi-fold window enables you to fully open one side of the room whilst retaining valuable wall space for furniture inside the room.

Also ideal for the commercial sector, Vevo bi-fold windows can transform a café or restaurant during the summer months – giving your establishment an open, outdoor feel whilst being child-safe and secure.

Not only does the bi-fold window have high energy efficiency, it meets the highest security standards and is manufactured in the UK. With a huge choice of colours and pane options, Vevo bi-fold windows can look either modern and contemporary or traditional, enhancing any type of building.

Design Options

Windows & Doors

Trusting us to use Vevo products to transform your home and lifestyle brings exciting choices. Not least, the opportunity to choose from an almost limitless range of colours, profiles, textures and styles for the look you want.

Georgian Bar

At Vevo we manufacture our Georgian style double glazed sealed units with an internal bar to give the effect (at a distance) of separate sealed units.

This popular feature is always in demand as it combines stylish traditional looks, with an easy to clean, low maintenance finish.

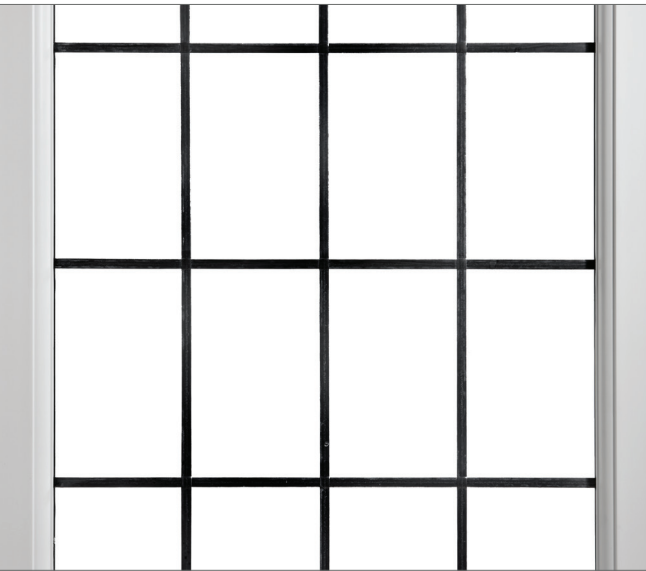

Astragal Bar

Designed to replicate traditional timber windows, the Vevo Georgian astragal bar design goes one step further than our Georgian window.

As well as incorporating spacer bars between the glass, bars are also raised from the glass to give the window an authentic cottage style look, making the astragal bar extremely popular, particularly with owners of older-style properties.

Astragal bar is available in a range of colours. The standard size bar is 25mm and our new 50mm bar looks stunning when used as a false transom or a door mullion.

Leaded Glass

Traditional leaded windows are an important architectural feature of many houses and very much part of the English Heritage.

While a lead design serves no practical purpose today leaded windows can enhance a property of any age with character and charm. A wide choice of leaded window designs are available to closely match your existing windows. There are also two different colours of lead; silver and antique which provides a more aged look. Our leaded windows offer easier cleaning and maintenance as well as the enhanced insulating qualities of modern uPVC windows.

Decorative Glass

You don't have to lose the character of your property when you update your windows.

With a wide range of choice of decorative designs or even a bespoke design, your house will retain it's character whilst gaining all the benefits of new windows.

Equal Sight Lines

A more traditional look is achieved by designing your windows with equal width frames ensuring a balanced and equal sight line across all glass units. This applies both horizontally and vertically.

Unequal Sight Lines

Having opening sashes in certain areas of the window creates an unequal glass sight line between the sash and the fixed light.

Colour Finish Options

Not just available in standard white, our windows can be personalised to suit the style of your home - as well as its colour scheme.

PVC Doors

Every type of door for every style of home

Whether you're looking for a new front door to add character to your home, replacing existing patio doors or wanting a whole new look, Vevo's range of doors is sure to have a solution.

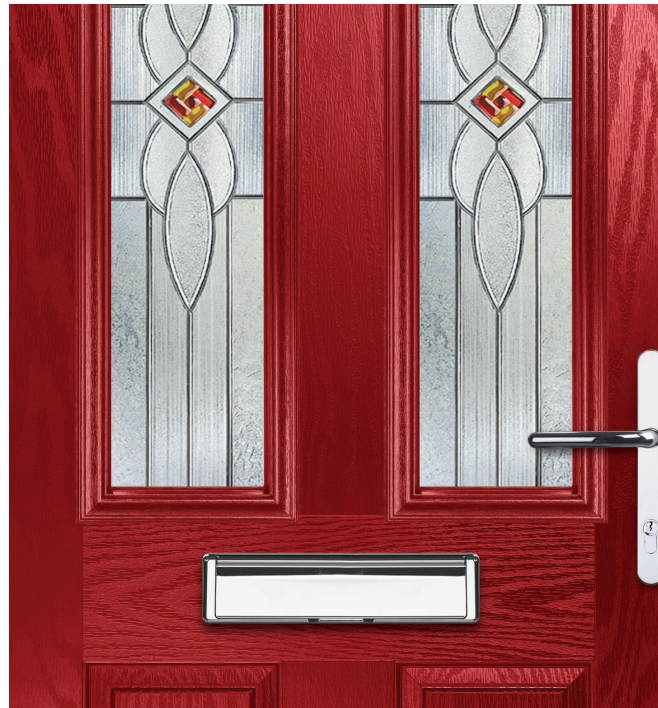

Style and performance don't stop at your front door. With a range like ours, you can be sure we've got a product to transform any entrance around your home. From French doors and period-style doors to the most contemporary sliding patio doors and bi-fold doors, the choice, yet again, is yours.

Composite Doors

A composite front door combines the traditional appearance of a timber door with the thermal performance and optimum style of a modern solution – offering up to six times the insulation of a timber door.

We work with carefully selected suppliers to bring you composite doors, which are secure and stylish.

Entrance

Doors

The Vevo range of PVCu front doors is designed to match perfectly with our window range to create a co-ordinated appearance for your home.

With matching sidelights to let in more light, decorative glazing options, handles, letterboxes and knockers, you can personalise your front door to welcome your visitors in style.

We will be more than happy to discuss all available colour and accessory options.

Back Doors

The choice is yours.

You can design your back door to be fully glazed, half glazed, clear patterned or sandblasted and as with all Vevo products a choice of furniture to suit your taste.

Stable Doors

More versatile than a standard back door, our uPVC or composite stable doors provide maximum ventilation without having to open the whole door, as well as keeping children and pets safely indoors.

We combine the following to make Vevo stable doors the perfect home improvement:

- *A colour that's right for you and your home*
- *Choice and flexibility with traditional and contemporary designs*
- *Low uPVC and aluminium thresholds available*
- *High-quality door furniture to compliment your stable door*
- *Security features to keep intruders out and your family safe*
- *Local, reliable installation and service*

Porches

You can really create the finishing touch to your home or commercial building by creating an inviting entrance and adding extra space. With the help of our professional team you can design the perfect porch for your period or contemporary property.

We will help you identify your homes unique characteristics and assist you in creating a porch that is in-keeping with your home, or maybe something completely unique.

We will take care of everything from base building and brickwork through to door fitting, windows, decorative panels and roof. We will match your existing brickwork and finish with uPVC guttering and drainpipes.

Experience guaranteed

We have fitted hundreds of porches in the surrounding area, so you are guaranteed an efficient and professional service every time.

French Doors

Offering a more traditional alternative to patio or bi-fold doors, the stunning Vevo range of PVCu French doors comes with the same high specification and colour options as our window range, just as you'd expect.

The Vevo French door is available in either 'open in' or 'open out' style to suit your living space and provide your home with a beautiful and secure entrance – complete with a range of patented low and ultra low threshold options.

And, of course, with Vevos unparalleled energy efficient, lead-free profile used to make every door, you can be assured of the highest quality French doors for your home.

PVC Door Security

Keeping the family safe

What's your biggest concern when you are considering new doors? Does security for your family and possessions come top of your list? If so, you'll be pleased to learn about the advanced safety and security features designed into every Vevo product that we install.

Enhanced Security

Anti-jimmy hookbolts and anti-lift deadbolts.

High security shootbolts top and bottom.

ModLok™

Developed in conjunction with Yale, ModLok™ technology not only provides the strongest possible locking mechanism for your security but also enables the PVCu to be disposed of in the most environmentally friendly way possible at the end of its life.

Wherever you see the ModLok™ icon you can be assured of the highest security standards.

Patio Doors

Our exclusive patio door with ModLok™ is one of the UK's only PVCu patio door systems to include a family-friendly low threshold option without the need for major renovation work to your home.

Available in the beautiful VevoSculptured profile, you can choose from 2, 3 or 4-pane styles, in a range of gorgeous colours to perfectly complement the style of your home – and your replacement patio door installation can usually be carried out in just one day.

With patented ModLok™ locking mechanism, in addition to a range of other anti-theft features, your Vevo patio door offers the highest levels of security – and as each Vevo Patio system is fully designed and manufactured in the UK you can be sure of the highest quality. The unique 'air glide' running system, means your patio door runs quietly and smoothly – you really need to see it for yourself!

Patio doors are also available in aluminium, see Visoglide Plus details in aluminium section.

uPVC Bi-Fold

Doors

Imagine being able to open up an entire wall of your room, bringing the outdoors indoors and bringing a whole new dimension to entertaining at home.

The Vevo bi-fold is the only PVCu range with a completely smooth opening and closing action, slimline frames, bespoke hinges and locks, together with a choice of styles, colours, pane combinations and handles – and our registered design low threshold opening for family-friendly or wheelchair access.

The bi-folding door range comes in a huge range of opening configurations so you can be sure of getting the right one for your home – from a 2-pane to a 7-pane door. Talk to us today about the most suitable combination for your needs.

Now with patented ModLok™ locking mechanism for extra security and strength, we believe it is the very best on the market. Add to that being one of the most thermally-efficient, helping to keep energy bills lower, and you can see why the Vevo bi-fold is a more cost-effective choice than a timber or aluminium door.

Aluminium Windows & Doors

Vevo Aluminium *Sleek and Stylish*

Vevo Windows offer a range of Aluminium products. We manufacture to your exact specification. With an almost limitless choice of colours and textures, you can complete the project exactly the way you imagine.

Aluminium Bi-Fold Doors

With Vevo products there is always an option. The option of aluminium provides additional strength and durability.

Thermally efficient they contribute to a reduction in heat loss and the cost of heating bills, providing warmth and comfort. The rigidity of aluminium sections means that these bi-folds show more glass and less frame than the uPVC option. In a white finish, they blend in seamlessly with a uPVC conservatory.

The strength and durability of aluminium also make them the perfect choice for commercial applications such as restaurants, cafés and bars.

Colour Options

The standard finish for an aluminium bi-fold is white, grey and black (powder coated) and guaranteed for up to 25 years, (although can be scratched if mishandled). Alternatively, any RAL colour is possible. You could choose one colour inside and another outside. To make a real feature of your bi-fold there is also a wide choice of metallic finishes. For the final touch, colour coded handles, hinges and roller carriers are available.

Aluminium Composite Doors

A range of elegant, high security doors, which you can tailor to your exact specifications.

Whether you want a traditional or ultra-modern door in heritage red or teal blue, the choice is yours.

Designer Doors

The Designer Door has it all. With a large choice of colours and glazing options, the Designer door doesn't just look good, you can be sure of its high-quality locking mechanisms keeping you safe and secure.

Features:

- 70mm door sashes and triple glazed units
- Three adjustable hinges resistant to 80kg of pressure
- All profiles contain polyamide thermal barrier that enhances thermal performance.
- Thermally efficient

Signature Doors

Just like the Designer door, the Signature range is also available in modern and contemporary designs. With a virtually limitless range of colour options and a stunning choice of glass designs and hardware, your door will have the perfect blend of security and style.

Features:

- 60mm door sashes and double-glazed units
- 3* Cylinders fitted to all doors
- Choice of three high security locks
- Double glazed, 6.8mm laminated glass fitted as standard.

Aluspace

Windows and Doors

If you want stylish interior doors or to create a work or study space this beautiful screen and door system is what you are looking for.

You can choose from fixed screens, hinged, sliding or pivot doors. All options feature elegant, slim lines and a choice of double or single glazing.

Aluminium *Windows*

Whether your property is contemporary or traditional, Vevo's range of aluminium windows has something for everyone.

Our casement windows have a choice of flat or flush frames, a flat or stepped sash. Tilt-and-turn windows are ideal when you need a larger opening, as they flood your property with light and air.

The heritage window is a stunning option for an older property. Add the art deco style handle for a touch of class.

Aluminium Doors

Our aluminium doors offer a sleek design and excellent energy performance. Single or double doors, whatever the style, whatever the colour, we can tailor it to your needs.

If you want a heritage look, then that isn't a problem. Add an art deco handle to our heritage range for the finishing touch!

Our Patio doors are available with a double or triple track in 2, 3 or 4 door configurations made with slim sightlines to maximise your view.

Vevo aluminium doors are available in an almost limitless colour range. They won't fade, chip or warp, so your doors will remain beautiful for years to come.

Conservatories & Orangeries

Add light & space *To your home*

A luxury dining area? A second lounge, playroom for the children or a spacious hobby room?

Imagine using the extra space that your Vevo conservatory or orangery gives you, and how it will transform how you live all year round.

Choosing the right conservatory is a big decision. Your choice must complement your home and your taste. It must integrate seamlessly with your house and garden. It must match the scale of your property and the way you use your home, and it must suit your budget.

That's why, whether you choose a Georgian, Victorian, Orangery or the simplicity of our Lean-to conservatory, it's so important for us to help you make the right choice to enhance your home. With more options and more helpful support from us, you have more freedom to choose the conservatory that's right for you.

A bespoke conservatory has limitless possibilities, so if a standard design doesn't fit your space; a Vevo bespoke conservatory is limited only by your imagination. Talk to our sales consultants to picture the ideal living space and make it a reality.

As your local installer of Vevo conservatories, you can count on us for superb products, installation and customer service. Service that begins with your call. Service that continues long after our methodical, courteous, professional installers have left you with a smile on your face.

Orangery

Orangeries, like conservatory styles, are both traditional and contemporary.

With their brick pillars, orangeries offer more privacy than conservatory styles and the interior height provides a breathtaking focal point through which light floods in to your home. Your orangery will also offer a seamless link between your home and garden. Orangeries use less glass than modern conservatory styles.

Lean-To

The Lean-To conservatory is the simplest of conservatories in terms of design and its clean lines help it maintain a contemporary look.

Whether your lean-to conservatory is traditional or contemporary, the style is perfect for properties that have restricted space under the eaves, like a bungalow, or have an area that's too awkward to accommodate a conservatory. This is because the pitch of the roof on lean-to conservatories can vary – so a shallow pitch can fit under a low bungalow roof and a steeper one would be ideal for a terraced house.

Gable

A gable-end conservatory can add real grandeur to your home.

A gable-end conservatory is square or rectangular in style, like a Georgian conservatory. This gives you maximum space to plan the interior of your gable-end conservatory. The gable front of the conservatory adds style and also maximises light coming into the room, while the height of the conservatory gives the room a feeling of space.

The gable roof provides a grand and stunning impact both inside and out, and the front of the gable-end conservatory can have a number of designs including a 'sunburst' effect.

Victorian

The Victorian conservatory is the most popular style of conservatory and it suits all styles of house and home whether it be a period property or a new build.

The Victorian conservatory style includes a bay front, a steeply pitched roof and ornate ridge details. Styles comprise the three-facet Victorian, featuring a bay front with three main windows at wide angles, or the five-facet Victorian. This conservatory style also has a bay front but with five main windows for space as well as aesthetics.

Georgian

The Georgian conservatory style is characterised by lightness and airiness, with more subdued lines than the ornate Victorian'

The Georgian conservatory style features a flat front and a square or rectangular symmetrical shape and typically has a high, sloping roof style that gives a spectacular vaulted effect. Your conservatory floods with light, making it a bright, airy and uplifting room.

Lantern

For those with the right budget, a lantern conservatory style makes a fantastic statement of grandeur and elegance.

Lantern conservatories feature a two-tier conservatory roof on different levels, creating a 'wedding-cake' effect. The two levels are separated by a row of windows that is highly stylish and makes this style ideal for period properties of Victorian and Edwardian vintage, where relatively plain conservatories might not match the grandeur of the existing building.

The lantern conservatory is a style that is often chosen to house swimming pools, orangeries or for larger conservatories.

Solid Roof

Is your conservatory too hot in the summer and too cold in the winter?

A solid roof may be the perfect solution. Whether you are constructing a new home extension or replacing an old existing conservatory roof a solid roof can give you total design flexibility and the ability to create stylish and thermally efficient rooms like no other solution on the market.

Constructed from insulated composite external panels and slab insulation, solid roofs are strong and robust yet extremely thermally efficient.

P-Shaped

P-Shape - combining a mix of lean-to and Victorian styles, a 'P-shape' is the ideal choice for a larger conservatory.

Ideal for larger, detached properties, this style combines a lean-to conservatory with a Victorian conservatory, which can be either three-faceted or five-faceted. When you combine a lean-to with a Georgian-style conservatory, this is called an L-shaped style. The P-shape style is commonly used as two separate living areas. Modern families often use the longer part of the P-shape style as a lounge or dining area, with the rounded part being used as a children's play area.

Bespoke

Although all our conservatories are custom built, you may have your own unique requirements.

You may wish to have a completely original shape of conservatory designed and constructed to fit your requirements. The door, window and roof systems that we install can be combined in many unique and exciting ways.

Our Accreditations

Dedicated to excellence

We are committed to providing our customers with the best quality windows and doors. To achieve this goal we have devoted time, effort and expense into obtaining all the relevant standards and accreditations the glazing industry has to offer.

Product Accreditations

Secured By Design

Secured by Design (SBD) is the official police security initiative that works to improve the security of buildings and their immediate surroundings to provide safe places to live, work, shop and visit.

The Police Preferred Specification - provides a recognised standard for all security products that can deter and reduce crime. Only VEVO Window products qualify to hold this certification and are third party tested to PAS 24
