

Vevo4000

Unique slide and fold dual hollow aluminium system. The doors sashes which sit in a rebated frame have an external curved shape with internal beading. Bottom wheels and top glider are safely concealed within a dedicated floating mullion with the door leafs being joined by a butt type knuckle hinge. Suitable for domestic retail or commercial applications.

System Features:

- The folding door system with thermal break allows you to create large passages.
- The system is ideal where heavy usage is expected.
- Sashes are hung from a floating mullion providing additional strength and stability.
- Sashes slide on 4 stainless steel rollers on a steel track giving a smooth operation.
- Attractively styled round-edge profiles.
- Dual colour option available.
- Odd leg frame available.
